

Usama Ghazi

Full Stack .Net Developer

+92-349541015 — ghaziusama.com — usamaghazi367@gmail.com — linkedin.com/in/usama-ghazi-awan

Professional Summary

A detail-oriented Software Developer with hands-on experience delivering scalable applications and APIs. Proficient in building web and desktop applications using .NET technologies, Bootstrap, and WordPress. Passionate about creating high-quality, user-friendly solutions with optimized performance.

Professional Experience

IMMENTIA - App Developer

Jan 2024 – Jan 2025

Multi-Module Employee Management Portal Development and Maintenance

Project Details

- An employee portal tracking activities, attendance, profiles, and achievements.
- Developed an Admin/HR portal to manage employee details and track their monthly progress.
- Developed a finance portal featuring a POS system and salary adjustment functionalities
- Developed an e-commerce portal allowing employees to make purchases with automatic salary deductions.
- Online advance order food from canteen with salary deduction.

Roles and Responsibilities

- Used .net v6 nearly 10 months.
- Develop an employee portal for attendance, salaries, and profiles
- Build HR portal that managed employee queries and support.
- Developed an online canteen ordering system for the organization.
- Developed a system to display employee data and details.

Bootstrap Static Sites

Project Details

- Create complete templates by following the provided PDFs, images, or design specifications.
- Add lead generation forms on each site for user engagement and data collection.
- Ensure responsive design and cross-browser compatibility for better user experience.

Roles and Responsibilities

- Used bootstrap v5.
- Integrated and unified domains with similar design and structure.
- Designed and implemented a visually appealing, fully responsive interface for seamless user experience across all devices.
- Developed a dynamic lead generation form with real-time validation and seamless data integration.

The Hexa Technologies - Software Developer

Sep 2022 – Jan 2024

Desktop Application for Cash and Carry, Shops, and Stores

Project Details

- Manage sales orders and product inventory.
- Handle store purchases and stock management.
- Track and manage store expenses.
- Generate reports with PDF, Excel, and charts.
- Manage online banking transactions.

Roles and Responsibilities

- Used .net framework v4.5.
- Revamped the entire application with a modern, user-friendly interface and optimized performance.
- Designed and implemented comprehensive RDLC reports with graphical data visualization for the entire application.
- Integrated a comprehensive employee management section, enabling streamlined handling of employee data.

Contributed to a web application project for the KP Government's e-bidding platform

Project Details

- Three types of portals: Admin, Entities, and Vendors.
- Admin can manage users and monitor the entire bidding process.
- Entities can place bids and complete the bidding process until finalization.
- Vendors can view all bids and submit quotations for specific bids.

Roles and Responsibilities

- Used .net framework v4.7.
- Designed and implemented the complete bidding process, from creation to successful completion.
- Built the functionality for vendors to generate bid quotations and submit them for entity approval.
- Developed user management features for administrators to handle different user roles and permissions.
- Created RDLC reports and optimized stored procedures for the entire software using SQL queries.

E-commerce Web Application for Paint Dealers

Project Details

- Normal and Registered Users: Designed separate interfaces and functionalities.
- Admin and Agents: Handled administrative tasks and agent operations efficiently.
- Calculates required paint for a specific area using available paints.
- Computes vendor and registered user balances.
- Admin panel manages products and orders.
- Connects the web application with the client's desktop application.

Roles and Responsibilities

- Used .net core v1.0.
- Implemented a robust system to handle and track orders from both registered and normal users efficiently.
- Developed and maintained the admin panel and agent order management system for streamlined operations.
- Implemented a system to accurately compute the total paint required based on total area specifications.
- Integrated order management and store balance between the web and desktop applications for seamless synchronization.

Online Advance Hotels Booking For Hajj and Um-rah

Project Details

- Admin panel manages users and bookings.
- Vendors handle their bookings and approvals.
- Users can book hotel rooms and manage packages.
- Create and display different packages.
- Show all registered hostels, vans, etc.
- Email system informs clients about their bookings.

Roles and Responsibilities

- Used .net core v2.2.
- Developed a module for occasion-specific packages and implemented a seamless booking system.
- Designed and implemented a system for collecting and managing client information efficiently.
- Integrated booking management into the admin and vendor panels, enabling seamless tracking and responses.
- Developed admin panels to create and manage customizable packages efficiently.

SMART TECH SOLUTION - Web Developer

Feb 2022 – Jun 2022

Project Details

- Built basic static websites.
- Implemented CRUD operations in .NET Windows Framework.
- Developed an API using Entity Framework for a Flutter application.

Roles and Responsibilities

- Engineered responsive and mobile-friendly websites for seamless user experience across all devices.
- Designed and implemented a basic CRUD operation system for efficient data management.
- Developed an API to handle daily expenses, manage sales, and track purchases efficiently.

Skills

- **Programming Languages:** C#, JavaScript, SQL
- **Frontend Development:** HTML, CSS, Bootstrap, jQuery
- **Database Management:** SQL Server, MySQL
- **Frameworks and Libraries:** .NET Framework, .NET Core, .Net, MVC
- **Tools:** Visual Studio, VS Code, MS SQL Management Studio.
- **Cloud and Deployment:** IIS
- **API Tools:** Postman, Swagger

Education

Bachelor of Engineering in Computer Science
PMAS Arid Agriculture University, 2022
